Hazardous Weather Outlook
National Weather Service San Juan PR
453 AM AST Mon Jul 9 2018

AMZ715-725-VIZ001-002-100900-
St. Thomas St. John adjacent Islands-St Croix-
Nearshore Atlantic and adjacent Caribbean Coastal Waters-
453 AM AST Mon Jul 9 2018

This Hazardous Weather Outlook is for the U.S. Virgin Islands and the ADJACENT Coastal Waters.

.Day One...Today and Tonight

.Thunderstorms...There is a chance of thunderstorms with heavy rainfall and strong gusty winds across the U.S. Virgin Islands.

.Flooding...Heavy rains could lead to urban and gut flooding.

.Wind...Sustained winds up to 34 mph expected across the islands. Strong gusty winds up to 50 mph are possible.

.Waves...Hazardous seas up to 10 feet with occasionally seas up to 13 feet are expected across most of the local waters.

.Rip Currents...There is a high risk of rip currents for most of the local beaches, except for beaches along the north coast of Saint Thomas and Saint John.

.Days Two through Seven...Tuesday through Sunday

Moisture associated to the remnants of Beryl will continue to move across the local area, but gradually diminishing until early Tuesday morning. Once the system moves away from the region, weather and marine conditions are expected to improve while a mass of drier air along with some Saharan dust encompass the region. The high risk of rip current will downgrade to moderate early Tuesday morning.

.Spotter information statement...

Widespread spotter activation is not anticipated, however individual spotter are encouraged to report high winds, flooding and rip currents to the National Weather Service in San Juan.
