ok

On Thu, Aug 2, 2018 at 4:08 PM, Richard Kahn <[REDACTED]> wrote:

Brice has been working with Casey Cook in order to achieve 68 acre feet by November 1, 2019 under Permit E7871

Note as of date Zorro has achieved 50% of this amount

The proposed plan to meet the conditions of the Permit is to apply water to existing grass lands within the 20 acres for grazing of the livestock

Brice has not put together a comprehensive budget but estimated total costs would be approximately \$125,000

Please advise on the two proposals Brice would like to proceed with:

1) Water Reel Irrigation System - \$17,565

Brice proposed buying one unit now to run with existing pumps and pipe as a test..
Then during the next few months Brice would work with Casey to design and install new piping system to support 2 units for the 2019 irrigation season

<http://kifco.com/OurProducts/Water-Reels/B-SeriesWater-Reels/tabid/102/language/en-US/Default.aspx>

2) Replacement of the VFD for well pump in Well B - \$13,589

In 2015 the well pump for Well B was upgraded to 50 gpm 3 phase motor and in so a single phase 7.5hp 3 phase VFD was installed

Brice says that the existing VFD is very susceptible to voltage fluctuations and currently needs to be reset daily..

Brice expressed that this situation has made it very difficult to achieve a constant water supply for domestic and irrigation purposes..

Brice proposes having RMC Electric install a new VFD with 25hp vs current 7.5hp drive which he believes will allow it to handle the power fluctuations from the power company

>

Please advise
