Is fun being a fly on the wall. See the below....

Main thing regarding you and Mitch is the 5 stage model of development ([REDACTED] relationship with the development of "special abilities," and where I perceive you (and Mitch) to be (high energy tied to symbols). I believe that you also have "special abilities" as Peter Fenwick and Masha also believe, but your energy system is still tightly coupled to stories and you have adapted a disciplined way of maintaining state.

This is why I irritated you so much with the Cuba Conference (which from your perspective was a waste of resources), and my leaving the Vive at your place infuriated you so much. As I mentioned in our meeting, I had a different perspective (Cuba conference supporting Giuseppe's event) and Vive as a gift to you, but not having a proper place to set up).

My objectives with you are three-fold:

- 1) Research in human development / potential (special abilities). You have a great rolodex of people. I have a framework and collecting subjects. Meetings such as the one between you and Mitch also help me in understanding.
- 2) Facilitate your own development (I feel that I have a good model of where you are at and my objective is to help raise awareness as we develop more shared experiences with our meetings).
- 3) Developing a service to facilitate the development of others. Joe has been a great project in this regards.

[REDACTED] love to continue our conversation regarding a way forward.

The guy I wanted you to meet (Tuesday) was late in getting his bio to me to forward to you, hence the lack of response on my end. He also had a very interesting synchronicity regarding you which I will share with you in person.

gino
