This structure is a little convoluted, but attached the limited partnership agreement for the entity that owns bitmain stock and the operating agreement for the LLC we would be buying into (this we can change as long as we give them whatever fee we agree on).

I haven't gone through them yet but the agreement for iangels technologies llps contains (some) details on the bitmain shares. (From Page 42 on).

See screenshots for more context, will let you know what he says on the phone when I talk to him (about 2hours from now).

Thoughts?
