Good morning Rich.

I just wanted to remind you of this and see if you have some time today to discuss it.

There is a window that is closing regarding getting on the schedule with both individuals that we need to get the work done, sooner rather than later.

Please let me know when this can be addressed and put behind us.

Thanks,
MG.

Good Morning Rich.

Attached please find an updated proposal from Metcalf Marine Exhaust that includes them doing the install of their product. Their previous proposal assumed that Bob Lamear in PR would be doing the install but he has since backed out due to labor issues.

At the same time as the exhaust install by Metcalf, Bob will be installing a new rub rail that we have already paid for and some other miscellaneous work that he and Boscoe have arranged along with some general upkeep work by Boscoe.

At this time both Metcalf and Bob have the time next month to get this all done within roughly a two week timeframe. Included in Metcalf's proposal is a trip to STT to do onsite measuring in the engine bay before the fabrication can start.

I would like to discuss this with you as soon as you have the time as I know this has been a lingering issue for some time and we still have an insurance claim to finalize regarding the Barge and getting this work done would allow that to happen.

Thanks,
MG.

Michael & Bill,

Please find the attached estimate that I have enclosed for your review and approval. This is to include us doing the complete fabrication, all the insulation for the exhaust, onboard service for measuring, test fit and installation and to cover travel expenses. The only thing that's not included is shipping costs and that will be determined at time of shipment and will be additional. ■ verifying with the muffler manufacture delivery time on the mufflers and I will let you know when we can start. Please contact me with any questions.

Thank you in advance for your business.

We look forward to working with you!

Best Regards,

Mike Metcalf
