---

Jeffrey,

Palm Beach to Marrakesh is definitely nonstop in the GIV.

Running Long range cruise (LRC) at Mach .77 is flight time is 7+46 min according to Universal.

I have requested the flight plan at .80 Mach which should bring the flight time to 7+30 min or less with current average tail-wind of (+30kts tailwind).

I'm estimating landing with 5,500 lbs of fuel running at Mach .80 which is approx 1+20min of fuel resv.

I'll have universals flight plan later this morning running the trip at .80 Mach

Thx

Larry

Attached is universals sample flight plan for your review.
