---

Mike budget number for two LSJ replacement generators is  $38,000 \times 2 = 76,000$   
Even if an extra 24k on other we are in for 100k

Lead time 10 to 12 weeks

We have already spent 150k on oversized generators that still do not work...

Please advise  
Thank you

That is a budget number and not a quote to buy number. A much more specific conversation involving cat, Russelectric and myself will need to take place if this is something Mr Epstein is serious about. Your total should be within range of being able to consider whether it is a direction to go in or not. MG.

mike am i reading correctly that to replace existing LSJ generators with properly sized more efficient units the cost would be  $38,000 \times 2 = 76,000$   
please advise if correct and if there are any other costs involved..  
thank you

Good morning Rich.

This is the alternate generator set to replace the existing 500 kw units. There would need to be two and they would be compatible with the Russelectric switchboard and able to be paralleled.

They would be capable of serving the existing load on LSJ with room for approximately a 50 to 75% increase over the existing demand.

The lead time looks to be the same as when we ordered the new rear ends, standard 10-12 weeks.

I asked for budget pricing as I have not gotten into specifics regarding any special programming or software for the Russ switch, if needed.

Let me know if you have any questions.

Thanks,

MG.

Morning Michael,

I have put together budgetary pricing for the D175:

D175 - \$38,000

Lead time on the unit is currently 10 to 12 weeks

Let me know if you need anymore info.

Thanks,

---

Just following up on our conversation on Monday about the two 175 units.

Thanks,  
MG.

Good morning Brandon.

Could you give me a call when you get a chance to discuss a new quote on a couple of gensets please.

Thanks,  
MG.

Good morning Brandon.

The quote is fine and I have passed it on to a gentleman by the name of Rich Kahn who will likely be giving you a call today to discuss it a bit further.

Thanks,  
MG.

---

Morning Michael,

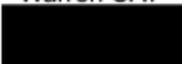

Hope you had a great 4th!

I have revised the proposal to reflect both quotes:

We had an improvement in lead times, so I also updated the lead time for the 125 kW to 10 weeks.

Let me know how else I can help!

Thanks,
