Attachments: Proposal_25_KGPD_SWRO_System_Great_St_James_6-30-2018.pdf;
GSJWaterSupplyOptionsLTR2-19-2016Final.pdf

i did not send wire today for GSJ RO as my thoughts and concerns are as follows:

- 1) dean will be onsite all week (8/27-8/31) and thought just in case after walking GSJ he changes design or approach on RO
- 2) the last quote for LSJ i was able to negotiate and if i sent wire today i would lose that ability.

below are highlights of quote which is attached below on PDF

note i also included below TSG quote from 2016 which also gave a nice summary of what we inherited..

Cost: \$213,810 for 25,000 gallons per day seawater RO unit

Leadtime for equipment to ship from Florida: 16 to 18 weeks

Installation: 1 week of labor

Note the 213,810 does not include the following additional costs:

- a) shipping and clearing of equipment from FL to STT and transpiration to STT
- b) transportation / hotels and meals for installers
- c) permitting
- d) piping and conduit, trenching and restoration for all buried pipelines and electrical conduits
- e) final design, supply and construction of the container mounting platform

please advise

thank you

Subject: GSJ Island - Water Supply Options Letter from TSG

Dear Richard,

Please see attached letter.

As we described, this is budgetary pricing only and can be adjusted as more details are filled in. Thank you for the opportunity.

Best Regards,

Bob Petersen
