GIV update from earlier today,  
I'll get update now:

<[REDACTED]> wrote:

Larry, we have an intermittent problem. We saw a little resistance fluctuations on the pedestal switch so we replaced it. Now it is still intermittently failed and we are looking at the solenoid at the TR. if we have to replace this it would not be ready [till tomorrow evening](#) and not the AM. If I had to make the call I'd say it won't make an AM flight and still get it fixed
