---

A couple hours ago I met a hottie (because of Rosh Hashanah services, go figure) who works at APTIM as an associate emergency management analyst. APTIM ([www.aptim.com](http://www.aptim.com)) is a recently rebranded (<https://www.pehub.com/2017/07/pe-owned-cbi-capital-services-business-rebrands-to-aptim/>) firm that has expertise as contractor to governments and others to fix up big messes with infrastructure, environmental engineering and consulting, And according to the website "APTIM provides full scale small cap engineering, procurement and construction services (EPC), including processing units, civil service, earthworks, and fuel system projects."

I asked her if she knows whether her firm has worked with or is going to work with the USVI. She did not but offered to put me in touch with those who know and/or do. If you wish my assistance in connecting with this firm, I am offering so just ask. I think mediating for you will only help me get this woman's attention and interest, so that's what's in it for me -- in addition to helping you sort out and get the help you need with your island assets and island relationships.

With best wishes for a healthy and happy New Year,  
D.
