1, sorry - I certain we agreed on all on same level. as you recall i said it would make it not servicebale for the maids not this option. at all we can build the pool on the cliff edge. as it already exists. no need for it to be so far back. I need to see masses of the buildins not only the floor level. / and put over a template of as built to judge where things really are. . your drawing has 26 meters from pool to water. not sure why ?

Dear Jeffery,

Please find attached our latest work progress presentation dated the 28th of December 2018 for your information and comments.

You will find in the attached file the following:

-

Main villa

Option 1: Consistent with our last discussion.

Option 2: Following your request to protect the terrace from the terrace area/night area, we had to move the whole building by 5 meters to the center of the island. The building is moved but the access road to the Main Gate remained is fixed.

We also solved the traffic problem of services/servants equipment without stairs inside the building.

The 3D views are visualization at ground level and earthworks to make you understand the earthworks relation with the building. Of course this needs more elaboration with the final aspect of the landscape and architecture.

SPA

Including the identification of staff areas (red).

Fisherman Cover.

Option 1: as discussed

Option 2: according to the regulations (+ 15m)

Urban Plan

We will work on roads plan to connect all the building next week.

I am at your disposal to organize a Skype Monday morning

Xavier CARTRON

Chairman
