Good morning Richard,

The rails are shipping on Thursday, once I have the Bill of Lading I will forward it to you.

The transit time is 3 days.

With regards to the slats, new slats are not required as I stated earlier.

There should be a space between the 1st slat and the head and foot rail.

I have double checked this with my team here and the slats that you have are correct.

I would be happy to speak with [REDACTED], I have no message from her so please provide a contact number.

I will keep you updated.

Thank you and have a great day.

Good morning Richard,

I am working on shipping to get the rails there as quickly as possible.

My team has advised me that slats are not required, the current slats for these beds are correct.

The last slat in each roll should have a space between the ends of the bed and the 1st slat.

There are predrilled holes that will line up the slats.

I will have a shipping answer 1st thing this morning.

Thank you and have a nice day.

Good Evening Rich

Mattress size is correct, standard size for queen beds

I have confirmed size a number of times,

I have been on site for all construction of beds and all have been constructed correctly, there are very few parts hard to not get the assembly correct
