Subject: Re: Evaluating Noam's gifts to [REDACTED]

Please find my estimated future earnings worksheet attached, Vincent

I used conservative estimates.

The numbers would be higher if, for example, Noam were to update any of these editions for an anniversary, or with a new preface. Or should an unexpected event occur, such as a book being cited prominently in a movie or TV show.

Please let me know if I can help with anything else.

Best
Anthony

>

> I believe the way to approach the issue is as follows: You cannot know precisely what will be received in the future but there are many instances in the law where estimates are acceptable. For example, when a business seeks lost profits or an injured individual seeks compensation for lost earning capacity the law allows experts to make reasonable assumptions to calculate an estimated damages number. I realize you are not an expert but here's where I think you can help. Make some reasonable estimate of how long each work will continue to generate revenues and then make an estimate of what the gross receipts will be over that period of time. Make your best estimate which will not be perfect. We can set up a call if you want to chat. We appreciate your help on this.

It sounds like I will not need you to deal with publishers if you can give me reasonable order of magnitude numbers. For example, for Imperial Ambitions received approximately \$750,000 in royalties to date with the work still in circulation.
