Hello Rich

Attached Product information and Proposed cost for the purchase and install of a
Snow Plow

84" Broom for Skid Steer

Link showing proposed Broom

Video of Broom Demo at Ranch, 11/13

Photo of Broom Connection to Skid Steer.

Photo of Road Sweeper, alternative to Broom, cost higher.

Proposing the Ranch purchases both these items to keep the newly Paved Roads clean of snow and debris.

The snow plough would be installed on the Single Wheeled F350, the blade would be removed during the winter months

The Broom is compatible with the existing skid steer, it would be used year round to sweep Paved Roads and Parking areas. the front end is articulating to approx 30degrees.

Note: Exist Grader/Blade is not for Clearing Paved Roads, it will still be needed for Unpaved Roads to Well location, Lodge and Log.

Plow Cost: \$7300.00

Broom Cost:\$8410.00, additional cost of \$1000.00 for Front Shroud

how do you wish to proceed?
