Hi Jeffrey - Just in case you want to follow along with us this Fall Quarter, this week's homework and the two papers the questions refer to are attached. The course has grown to 55 students, and I've been asked to draft a course proposal for a General Elective - a typical enrollment for that mostly-freshmen class is 500+. I think I'll have more music in that one - as you noted, our long-time Music Mind & Brain seminar is very (too?) neuroscience-oriented - working title for the GE: "The Art & Science of Music: From Bach to The Beatles"xxx
