---

I was planning to test fly G550 on Wednesday and fly to Teterboro, should I delay?

Jay informs:

Larry,  
What's the schedule on the jet?

We have a small snafu

The material for his divan is what he has chosen to use on the ½ bulkhead panel, pillows and curtain.

We only have enough to complete the ½ bulkhead panel.

The manufacturer has stock but it's in the UK and we won't receive it [until Thursday](#) so the curtain and pillows will not be ready by close of business Wednesday

We can template the curtain and when it's done ship it to you with the pillows.

I would have loved to have delivered the jet with everything complete but I'm not sure he wants to hold up a flight for a curtain and pillows.

Thoughts?
