Amy,

Thank you for the photographs. I appreciate Mr. Epstein's willingness to resolve the issues documented during our site visit. Please provide a report with photographs indicating that all of the voluntary restoration offer terms have been met. Lastly, submit an application for the proposed dock identifying additional structures to be removed. I understand that it is difficult getting resources to the island without the proposed dock and this process is delaying recovery efforts. I am willing to resolve this quickly after the appropriate actions are taken.

Very respectfully,

Jonathan Pempek

Jonathon,

I hope all is well. As per your request here is a series of photographs of the riprap along the northwestern shoreline of Little St. James.

As you'll remember some of the boulders were moved by the storm.
