Jonathon needs all the information I sent to you to remove the enforcement for the other parts. He was very specific about what he needed. The only thing left was he was going to tell me what to do about the riprap. I'll get him the pictures but we need to send the other stuff to get him to free LSJ permits. We need permits signed to give him.

I don't like the survey. It make it look worse. I'll get the permit from the point.

I still don't think the survey looks like what is there. I'll get a picture of it either later today or first thing tomorrow. On the modified application and the dock do you still want Erika to sign.

As I was reading over all the old files over the last several months it keeps hitting me that we resolved the dock. I think Paul Hoffman may have some of that paper work. I think there may be some confusing related to the shade structure, was a permit issued from USACE for the shade structure.

I have tried to say as little as possible on the LSJ issue. Jonathon has not told us how he wants us to resolve the shoreline change. In looking into more depth on the dock, I believe that there may be some confusion. The dock and the pilings were resolved years ago. And there was also a subsequent issue we resolved with the jetty ski dock. I believe the issue may have related to the shade structure rather than the whole dock.

Again this has Erika name on it to do you want me to change that. I can send this in as soon as I have signatures.
