Hello Jeffrey,

You will find attached the working progress for the project ; We updated the organization scheme according your comments during our last call.

Taking consideration the new dispatching and connections of the rooms, we worked on new proposal of the floors plans of the house;

You will find two floors level but in fact we will adjust and play with the topography of the landscape considering the highest part of the project will be your part and the main entrance lobby.

The project will develop all the way up to the beach thanks to a set of levels and terraced architecture; But also all part is connected and at the end will give the idea of one building (for the Main) as a Palace, like a stone ship anchored on a hillside!

The layout are organized following an orthonormed grid, playing with symmetries and the penetration of the landscape inside the house like some patios which offers a protect living areas and assure a continuity between the architecture and the landscape.

Some terraces & pools are proposed in the continuity of the room and connecting with the horizon.

Of course all is in still in progress to show you the taking in consideration of your last requests and comments and we hope you will share this same vision of the project.

If you are agree in the principle we will move for the development of this project and go for the architectural concept.

Also you will find some mood boards for architecture sources to share with you the routs and spirit for the project,

We are very exciting for this project and again we thank you for that.
See you soon

Dear Jeffrey,

We hope you are well, do you plan to come in Paris as we discuss last time for a presentation of the progress of the project?

Thks & best regards
