The New Generator is installed in the Helicopter and operation check is good,
The part arrived early, so I flew down to St Thomas this morn with the Bell Mechanic,,
We are going to install the Tail Rotor Pitch links tomorrow, then test fly the Heli,,
The background noise we heard in the headset is gone, actually the Bose headsets are quieter now,,
Heli will Be Return to Service tomorrow afternoon

I've been talking with Darren, Dave and Pete, along with Gulfsream Tech support to get explanation, why the crew had to Re-set the AC system to get the converter / Micro wave power restored,
in the past I've seen the 1conv light illuminated sometimes on the rear Gally master control panel, I'll revert back with answers as soon as SAV tech support reviews the Data from the Plane's download.

Thx
Larry
