Greetings Sir, this is the boat I saw in Tortola its an aluminum munson boat, has triple volvo diesels with outdrives. There is two broken windows in front that could easily be repaired. According to the owner engines are running and boat ready to go asides from some small repairs. I do not know a lot about these volvo diesels and outdrives, if you are interested I would recommend having Boscoe and Mike come along to inspect engines and elec systems and tell us what they think. Please advice.

Carlos
