Greetings all, this are some pics of the redo repairs on the nautica 42. As you can see they beefed up the corners and used g flex resin which is a very strong epoxy resin. The cracks moved up to a weaker part and surfaced again after just a ride back on 2 foot seas from Tortola. I spoke to BVI painters this repair was not warateed as they consider that the boat is flexing significantly. All other cracks on cabin entrance and v birth area have not resurfaced. I would like to ask if you would like to have a survey done to establish a value on nautica to be able to advertise for sale. Please advice respectfully
Carlos

As a note survey is 20\$ a foot.
