seat design. will be the most difficult. 1 heli s vibrate a lot!! . angles are extreme. . its not a car seat or an airplane seat or a home sofa. . to tight and you feel as if you are on a vibrating bed in an 50s motel. too losse and you slide. . so no shiny leather. . cloth fat grip. the back cushion . tricky . and arm rests both functional. strong. . its never been done right . most seats are put directly on the fuel tank and back cushion against the transmission. we should think about isolation mounts. . gels. vibration dampers. and underpadding for carpet could be rethought. . it really amazing that even in the new helis seats are an afterthought.

I know you want the helicopter to look "modern", but have you thought about colors?

Do you want to create a "Hermès" influenced interior?
