Subject: To guest professors, colleagues, and friends re: expanded Music Mind & Brain course

Date: Sun, 24 Feb 2019 02:18:31 +0000

Attachments: M103-M170.20190223a.pdf

Greetings -

Our Music, Mind & Brain seminar course is expanding to two quarters in Academic Year 2019-2020 - "new" here but actually a resurrection of the format and topics I had to kill several years ago in order to fit the original semester-long Harvard course into the UC quarter system. Please find attached the expanded Syllabus that is en route to the UCLA neuroscience and music curriculum committees. I am most grateful to you guest professors for your stellar contributions over the years, which have consistently been rated highly by the students. FYI this past academic year over a hundred students enrolled in the two course offerings.

For those of you listed in the Syllabus as guest professors for AY2019-2020, please check the Fall dates of your seminars - the sequence of themes is non-random, but as in years past we have some wiggle room to change the dates if necessary.

Yours,
Mark
