Very confidential:

Today, consumers want to personalised their perfume to their needs so the approach to selling fragrances has to change: department stores such as Selfridge and distributors are searching for perfume brands thinking about an environment that is acting with the mind of consumer, providing a product that is suitable for them, speaks to the consumer in the sense that it tells them about their preferences, personality, about themselves, to personalised their perfume to their needs and customers can unleash their potential. . . Today I am please to announce the birth of a new company Edeniste, with a breakthrough concept, the next generation of luxury perfumes.

Today Edeniste wants to become the first wellbeing perfume brand in the world: for this we need €2M of first round investment. I would be happy to get immediatly €500 000 (Seed investment) so the team can continue to work while i am raising the funds.

I have attached here a short presentation of Edeniste.

Let me know what you think and if you know the right people to raise for me the seed/first round investment in London and/or Paris.

Speak soon,

~~██████████~~

ENHANCED WELLBEING HEADSET: like you do blood tests, to assess your wellbeing, now with Edeniste you will be able to use innovative brain science technology to assess your wellbeing. Edeniste's elegant, wearable headset will detect brainwaves to understand emotional responses in real-time, while collecting GDPR-friendly data. Edeniste will use a real time display of emotion metrics, projection of frequency band information (theta, alpha, beta, gamma), revealing the clients brain's dynamics during the smell of Edeniste formulas.

This is also ideal for demonstration to the public, presentations to distributors and also educational: i can show the world how Edeniste perfumes are guiding the client to improve focus, reduce stress, bring energy and good feelings..

WELLBEING PERFUME PARTNER: following the successful launch and growth of Edeniste, in due course our emotion drops/touches can be sold to complement any luxury perfume on the market. These potential partnerships will create huge additional commercial opportunities, once we become the number 1 emotional wellness brand.

This is also ideal for demonstration to the public, presentations to distributors and also educational: i can show the world how Edeniste perfumes are guiding the client to improve focus, reduce stress, bring energy and good feelings..

We could imagine the following in the future: FIRST AUGMENTED/ VIRTUAL REALITY WELLBEING

SPA: the says of a traditional massage are over. Edeniste customers will enjoy a virtual experience to totally relax, not only their body but also their brain, using several of our senses, such as: 'vision, hearing, smell'.
