90 percent right. most work really great some ,unfortunatley mostly my fault - bad. some ,(divan) others just overlooked . fyi it appears temp fan in back got disconncted , hot in cabin over the atlantic , not much fun. but .. it happens\

1

1. the sides of the cabin door in front are two different colors. ? very ugly
- 2 iphone charger not good for flying. not solid. .
- 3 I suggest we inset leather on drink rails. cover cup holders and make them smaller. for voss. and find magnetic charger so phone
4. my captain chair needs a side pouch low hidden for glasses and pens. we might make the arms wider on just this chair
5. footrests. need adjustment , they are currently useless. we should make a small ottoman \
6. prontos work well and should be installed in place of small screens behind the panels on the window line\
- 7 the table mechanism needs to be re cut. magnets taken out. and stiffened where it meets the verical panel. which had a lot of rattles larry has video
- 8 . I think we should put a stictch on the tops. they look a little like placemats. without
- 9 the captains chair needs a repad.
- 10 the chairs in the cabin were shaking quite a bit on take off
11. the psu in the galley which looks great shold be changed to white and more down wash lights installed.
- 12 credenz top should be white to match the galley, and seats like the g4
- 13, we should cover aft bulkhead and lav door with fabric
- 14 many of the doors and latches were rattling
15. shelf for food storage with proper size top opening bag\
16. over the baggae door we left the old leather , change to white.
17. the psu over the sink should be white and cut back and made shorter, I kept banging my head when brushing my teeth

- 18 some type of cover for toilet paper
19. more cushion on potty seat. PLENTY of room
- 20 new potty seat. not nice
- 21 rear mag rack, should be covered as well in fabric
22. bag carrier should have higher sides to lay down books
- 23 . lets recover the two front seats in fabric
24. biggest is the DIVAN . almost nothing right. . arms should be higher and either fabric and soft to lean on , they should extend if possible to the out board wall. the fabric and welting does not look good. . on the seat cushion , it is deformed, I took photos.? the rear cushions are much too hard. angled incorrectly and the welting was put on the front side instead of the back. you and i were worried about the corner when you sat back on them. . when made into a bed, the drink rail is exposed , and rough we need to rethink the whole .
25. there is a light on in the bathroom floor that i cant turn off.
- 26 some of the switches need to be changed they are old and rattle. same for some latches
- 27 the new woof covered glassware covered rattled like crazy on take off. . putty on the sides of the outboard?\

28 it is going to be great. . the divan arms look too bulky and hard maybe cashmere arms with foam. not sure

29 odd -but some chair cushions are different than others. i measured. ? i kept switching them around

lots of photos and some videos
