Hi Jeffrey,

Attached are three (3) faucet stylings that can be accommodated on the new aft lavatory sink top allotted area.

Please note the new sink top sits approx. 2" higher and the faucet will sit approx. 2" further back than the existing.

There are several factors to take into consideration; one being the accessibility as the new faucet will sit under the mirrored cabinet which is why I proposed a style with a handle that extends further inboard as well as on the side. There was mention of having more of a "neck like style" but with the limited height the only "neck" style faucets available were not attractive.

With that being said, option 1 is our first preference.

We look forward to your feedback.

Jeffrey,

Attached is a TWO (2) page pdf with the changes to the aft lav vanity. This is an engineering illustration to illustrate the modified upper valence, relocation of the cabin management switch and the new sink.

Please confirm this is what you want?

Thank you.

Best Regards,

Eric
