Jeffrey,

I love this area and find it very alluring - the way classic and renaissance philosophers sought to match beauty (aural , visual and poetic too-- the "music of the spheres")with the essential orderliness they believed informed the "creation." I've done my only real work in this area by writing on jonathan Edwards (Protestant minister who read and was influenced by newton), and I've worked on Augustine, whom I love .I'm always stopped, though ,by being ignorant of the actual science --the closest I get when I am able to use a poem as a lens and/or when scientists have the capacity to explain using metaphor or very vivid description My daughter [REDACTED], loves this stuff, too

Lisa
