During my conversation with Jeff Shaw,. He informs that utilizing the L/H fwd seat 110VAC for coffee maker should be OK, he will confirm with his engineering dept. also,. this is who Eric uses for avionics engineering as well,. Jeff quoted approx \$3k for moving 110vac plug to use in fwd Cabinet for coffee maker,. I called Eric and informed him of this finding, Eric agreed with Jeff's \$3k, and acknowledged he budgeted \$3k for Jeff,. The rest of the \$15k Eric quoted is for his labor to modify cabinet,.

Recap,

Eric informed Rich and I,.

Profit on Fwd Coffee maker item \$2900

ProStar avionics to move 110vac plug \$3k

Remaining cost \$9100 is cabinet modifications,.

Jeffrey

I certainly don't need a \$15k cup of coffee in the Cockpit,.

Maybe keep the Hot Water pot currently installed, and I located Whole Food market Instant Coffee that only needs Hot water, would be fine.

Thx,

Larry
