Dear Jeffrey,

I know a rather brilliant young scientist who has been studying at Imperial College and recently completed his thesis. He is now at the Maxwell Centre in Cambridge. He is looking for funding. Other than being told by a friend of mine at Imperial that he is a quite outstanding scientist, his area of research is way beyond my comprehension.

I have attached below a message that I have pasted onto this email which gives you a little idea of what he is doing. Let me know if you would ever like to meet him when you next visit the UK.

You are about the only person I know who might get what this is!!

As ever,

Mark

"Ok i might answer more accurately later as i am on the train. I am within a group of photo-acoustic using sound to control particles (hundreds of possible applications as soil sensor for agriculture, skin sensor, or water filter). Many more... that my new field i am in with Dr. Andrian Stevenson that is supervising me. Then in parallel i am working with Dr. Paul Feyen (now in IIT italy but willing to relocate) on cheap incubator for diagnosis or fundamental research, on interface Nanoparticles with cells for cancer treatment, and prosthetic devices to sense or repair body/brain function

So far i have 6 month project in Cambridge then nothing as need fundings for projects. Each projects should have its own fundings. But can always put some projects together.

For me stay i cambridge 3 or 4 years ! I will need to find fundings

Paul Feyen can come with me to any meetings as necessary."
