ok send as is. remind her that it was her insistence on getting a permit to fix the gsj dock. that began all of our troubles. all we wanted to do was to replace the worn wood. and one year of aggravation would have been avoided if we had just fixed it.

What Mr. Pempek requested was the historical which we had to do as part of the last compliance problem and the current overlain to look at the differences. The current wouldn't help him, he already has noted difference on the aerials. He has already suggested that the riprap may have been moved offshore by storm and we could pull it back....

I am afraid he is probably going to ask for the area south of the dock which we did not include because he did look at that on the site visit.
