Interesting point you make about SheepSkin Cockpit seat covers.,
Found several opinions in Pilot Forum comments:

1-***The magic of 100% genuine sheepskin is simply that it will keep you cool in summer & warm in winter. No other natural or man-made fiber possesses the qualities of sheep-skin. Whatever the temperature in your cockpit, sheepskin covers remain almost the same temperature. Additionally, each hollow fiber absorbs up to 30% of its own weight in moisture. Keeps you dry, & never feels wet itself. You avoid the heat and clamminess of vinyl, or even leather, because of the free flow of air between you and seat. So there's your answer.

2- my thought,. In extreme turbulence, SheepSkin prevents your body from slipping in the seat. Fabrics would provide similar quality, but revert to the above explanation, breathability in cold and Hot temps., Also, easier to change a SheepSkin when worn,

Thx,
Larry
