---

Jeffrey,

I'll be looking into the lights this week and I'll get with Pete to go over the install to see if he can accomplish it.

I will have Maurice make the changes to the items and send off another rendering for review.

We can have someone do the latches. I will need to aircraft schedule so I can line someone up to do it.

Thank you for your understanding!

I hope you had a great weekend.

Jeffrey,

I don't have the greatest news for you.

I attempted to shift a few of our current projects but due to maintenance items and the aircrafts schedules I cant.

So based on our current contractual obligations the soonest we could bring you in to perform the work on your jet is July 30<sup>th</sup>.

I know that seems so far away but the up side is we would take advantage of the time to build and engineer your parts as well as procure materials keeping your down time to a minimum.

Once we have approval on all of the designs and materials I can give you the down time needed to get the jet completed.

I have attached 2 drawings showing where we are at with the design based on our conversations

I really hate giving you this news.

If you want to discuss anything further you can always get me on my cell.

I hope you have a great weekend.

Thank you
