MegaBackup isn't mine, it's malware/adware that usually is packaged with some other freeware app installed.

To remove it, you need to quit the megabackup process in /Applications/Utilities/Activity Monitor.app, then trash the app from Applications.

http://m.wikihow.com/Uninstall-MegaBackup

It usually doesn't install alone though, so I'd feel better if I could look at the machine and remove anything else that's hiding in there.
