Jeffrey

Had a good conversation with Susan they are willing to do the trip on Wednesday morning.,
The airplane is in Canada and they have to move their pilots from Savannah up to Canada tomorrow afternoon,
She indicated a price of \$11.5M,, but possibly lower for a quick easy deal since a Gulfstream prebuy was
accomplished 6 months ago.,

She also informs a price of \$30 to \$40k ish to accomplish the demo,,they are working he numbers now, they
would refund half of this money if you purchase the airplane.,

She already knows legally she can only except twice the amount of fuel plus pilot expense for a demo flight.

I figure total of 11 hours flying and a fuel consumption of approximately 4600 gallons total.,

Toronto Canada to St. Thomas to Teterboro to Virginia would be GV movement.,

Susan will forward me an official email shortly that I will forward to you explaining this trip.,

Thx

Larry
