Jeffrey,

We had a slight delay measuring the pool area because of the weather, but now that is done, we have been able to develop the concept design. I will be sending you a floor plan and simulation by Tuesday. I am also going to send you information on a sliding and folding glass wall that I would like to incorporate into the design behind the arches. It is frameless assembly that will preserve the transparency of the view to St. John while providing the necessary wind breaker. It can also be opened completely so that when the pool isn't being used, the area will be almost as open as it is now.
