Hi Dan,

Sorry for the slow response. I'm actually not supporting Quantified Mind anymore beyond paying the server bills. There isn't any feature to create all-new batteries - it can only be done on the back end. I used to do it for researchers but I no longer have the resources to put into Quantified Mind and I'm thinking of selling it since I no longer have time to maintain it, but I still want it to be useful to researchers and users. Until that happens, I think it's quite unlikely that I'll be able to add any new functionality, unfortunately.

Thanks for writing,

Yoni

Hello,

I am an analyst at a specialized private medical practice. We are considering using Quantified Mind as a means to measure patient cognition longitudinally. I would like to create a custom battery, but am having difficulty finding the exact tests I wish to include. I have tried using your custom experiment builder but am finding not all of the tests are available to add. Specifically, I would like to assemble the following tests into one battery:

- 1) Color-word;
- 2) Attentional Focus;
- 3) Sorting;
- 4) Verbal paired learning;
- 5) 3-n back;
- 6) Backward digit span;
- 7) Design recognition;
- 8) Design copy;
- 9) Mental rotation;
- 10) Coding.

Is it possible to make this specific battery? If so, how can I go about doing so?

Thank you,
Dan Palenchar

-Attia Medical
