Subject: Finders Course 10 Open For Registration...
Date: Sat, 19 Nov 2016 13:01:45 +0000

Hi Jeffrey!

Thank you for your interest in the Finders Course! I wanted to let you know that Finders Course 10 is now open for registration!

WEBSITE AND INFORMATION PAGES

The program homepage is:

[REDACTED]

Here is a new video series that was done for FC10:

[REDACTED]

Here is a registration information link for it:

[REDACTED]

Here is the actual application link, if you know you want to sign up right away!

[REDACTED]

IMPORTANT DATES

The registration period is now open and will close on November 28th.
The program will officially begin on January 14th.

To participate in the program, you will order the MUSE brain sensing headband, the Polar H7 heart strap, and the eSense GSR unit from a special link we provide. Because of the major holidays between now and when the course starts, we want to allow plenty of time for this.

The period between 11/28 and 1/14 will be used to make sure you get your devices ordered, that they work and don't need to be replaced, that you are comfortable using them, and so on. We need to make sure everyone is completely set to go and comfortable with their equipment before the course begins so that it doesn't affect your success in program in any way.

COST AND BAY AREA RESEARCH DISCOUNT OPTION

The price of the course for this coming round is discounted \$500 from the normal \$2500 price so that people can order any of these devices that they do not already have, along with some other needed supplies like electrodes.

If you are in the Bay Area and are willing to come to the Transformative Technology Lab at Sofia University in Palo Alto, CA and participate in extra research, you can get a \$350 discount, but only if you apply directly to us at the link above. In exchange for this, you agree to come down and get a full 64 channel EEG done prior to the course, after they transition to ONE, and at the end of the course. Each of these will take approximately 3-5 hours of time.

COLLEGE CREDIT

Participating in FC10 will also award 6 units of credit at Sofia University. This can be used

towards any of their programs, or transferred to another regionally accredited (the highest U.S. standard) university upon their approval.

The reason for this is that the course will be integrated into a new program in transpersonal psychology and consciousness studies at Sofia that will begin at the same time as the program next year (more on that will be announced later).

When that program kicks off the per credit cost will be \$1,025, so the college equivalent of the Finders Course will be \$6,150. This makes this run of it an amazing deal at \$2,000+equipment and supplies.

That's it for now! Thanks so much for all your continued excitement about the research!

Much Love,
Jeffery
