

WOODSON C. MERRELL, M.D.
44 EAST 67th STREET
NEW YORK, NEW YORK 10065

Telephone: [REDACTED]
Fax: [REDACTED]

Date: October 24, 2015

Patient: Jeffrey Epstein (Email: jeevacation@gmail.com Asst: [REDACTED])

Follow-up of Labs from Oct 15 office visit (ones not in then):

- Your PTH was normal again: 46 (normal < 65!)
- Your other hormones were all normal (growth hormone, insulin , DHEA), TSH)
- Your liver enzymes were elevated. For this:
 - follow this carefully with starting the Lipitor
 - start supplements to help protect:
 - herbal milk thistle one daily (Jarrow brand)
 - amino acid NAC 500 mg (Jarrow again) one daily
- Your homocysteine was elevated (15.6 with normal < 15.0) For this resume the MTHF form of folic acid (for which you are missing two converting enzymes from normal folic acid) FolaPro by Metagenics is a good brand, one daily until Homocysteine is <12
- Your urine test showed some blood in it. I would retest this—and this is a reason to see urologist Harry Fisch for both this and the testosterone rx (per 10-15 instructions).
- Other per 10-15-15 instructions
- Call me next week to follow-up all this

All supplements are available at:

Willner Chemists
100 Park Avenue
(41st Street)
NYC, NY 10017
