BOEING BBJ

CCI is pleased to offer the first BOEING BUSINESS JET to be delivered with the new generation Split Scimitar Winglets. This BBJ has only 24 total hours to date, and is ready for your choice of custom exterior and interior completion. The purchaser of this BBJ will benefit from the increased range and increased residual value from the installation of the newest generation winglets. The Split Scimitar Winglet (SSW) will be the Boeing standard on the future BBJ Max.

This BBJ is located in the U.S. and available for immediate delivery to start your custom completion. Seven Long Range Tanks are already installed and combined with the new generation Split Scimitar Winglets, the owner will enjoy over 6,000 nm range. Range circles and technical details are available upon request. Call to discuss this opportunity and to begin design and completion of this BBJ to your exact requirements, choice of materials, interior and exterior colors, options and interior configuration.

Examples of some BBJ completions can be provided to you upon request or be viewed in our photo gallery at www.flycci.com or contact us for further information.
