2. PROSPECTS OF PROFIT AND LOSSES

Market Expectation	Investors do not expect a credit event to occur on the Reference Entity.
Risk Tolerance	Investors are exposed to the default risk of the Issuer and the risk of occurrence of a credit event on the Reference Entity. Investors must be able to sustain significant risks and losses.
Profit Potential	The profit potential is limited to the coupons paid.
Loss Potential	In a worst case scenario, the investor may lose its entire investment

3. SIGNIFICANT RISKS FOR INVESTORS

This section cannot disclose all the risks related to the Notes and must be read in conjunction with the risks set out under "Risk Factors" in the Base Prospectus (including, without limitation, general operational risks, conflicts of interests, and the risk that hedging and trading activities by the Issuer or the Guarantor (or any of their affiliates) may affect the value of the Notes) and the risk disclosure brochure "Special Risks in Securities Trading" (Edition 2008), which is available for free on the Swiss Bankers Association's website www.swissbanking.org/en/homes/shop.

Structured products such as the Notes described in this document are complex and may involve a high risk of loss. The terms and conditions are indicative and may change with market fluctuations. Prior to investing in the product, investors should seek independent financial, tax, accounting and legal advice.

Credit risk: By acquiring the product, the investor takes a credit risk on the issuer and its guarantor (if any), i.e. the issuer's and/or guarantor's insolvency may result in the partial or total loss of the invested amount. This risk is however mitigated by the assets that are backing and securing the product. For credit derivative transactions or credit linked notes, investors will also be exposed to the credit risk of the reference entity(ies) mentioned in such product i.e. the reference entity(ies)'s insolvency may result in the partial or total loss of the invested amount.

For the products benefiting from a guarantee by Société Générale or by any other entity of the Société Générale group (hereinafter referred to as the "Guarantor"), the due and punctual payment by the principal debtor of any sums owed in respect of these products is guaranteed by the Guarantor, according to the terms and subject to the conditions set forth in such a guarantee, available at the Guarantor's office on request. Consequently, the investor bears a credit risk on the Guarantor.

Information when products do not offer capital protection: For products which include a risk of capital loss, the redemption value of such products may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment.]

Currency exchange risk: When the underlying asset(s) is/are quoted and/or expressed in a foreign currency and/or, in the case of an index or an asset basket, it contains components expressed and/or quoted in one or several foreign currency(ies), the value of the investment may increase or decrease as a result of the value of such currency(ies) against the euro or any other currency in which the product is expressed, unless the product includes a currency exchange guarantee. Investors may be exposed to a further currency risk and the value of the Notes may decrease or increase due to currency fluctuations if the Notes are denominated in a currency other than the currency of the country in which the investor is resident.

Market risk: the product may at any time be subject to significant price movement which may in certain cases lead to the loss of the entire amount invested. Certain products may include embedded leverage, which amplifies the variation, upwards or downwards, in the value of the underlying instrument(s) which may result, in a worst case scenario, in the partial or total loss of the invested amount.

Risk relating to unfavourable market conditions: The fluctuations in the marked-to-market value of certain products may require the investor to make provisions or resell the products in whole or in part before maturity, in order to enable the investor to comply with its contractual or regulatory obligations. As a consequence, the investor may have to liquidate these products under unfavourable market conditions, which may result in the partial or total loss of the invested amount. This risk will be even higher if these products include leverage.

Liquidity risk: For certain products, there is no liquid market on which such products can be easily traded, and this may have a material adverse effect on the price at which such products might be sold. As a consequence, the investor may lose part or all of the invested amount. Certain exceptional market circumstances may also have a negative effect on the liquidity of the product, and even render the product entirely illiquid, which may make it impossible to sell the product and result in the partial or total loss of the invested amount.

Information in the event of a buy back by Société Générale or of an early termination of the product: Although there is no general undertaking from Société Générale to buy back, terminate early or propose prices for products during the life of such products, Société Générale may expressly commit to do so on a case by case basis. The performance of this commitment shall depend on (i) general market conditions and (ii) the liquidity conditions of the underlying instrument(s) and, as the case may be, of any other hedging transactions. The price of such products (in particular, the "bid/offer" spread that Société Générale may propose from time to time for the repurchase or early termination of such products) will include, inter alia, the hedging and/or unwinding costs generated by such a buy back for Société Générale. Société Générale and/or its subsidiaries cannot assume any responsibility for such consequences and for their impact on the transactions relating to, or investment into, the relevant products.

Exceptional events affecting the underlying instrument(s): adjustment or substitution – Early redemption of the product: In order to take into account the consequences on the product of certain extraordinary events which could affect the underlying instrument(s) of the product, the product's documentation provides for (i) adjustment or substitution mechanisms and, in certain cases, (ii) the early redemption of the product. This may result in losses on the product.

Given the characteristics of the Notes, such Notes should not represent a significant portion of the investor's portfolio of securities.

Credit exposures to Reference Entity (ies): The Notes will reference the credit(s) of the Reference Entity(ies). The redemption amount and/or the coupons of the Notes will depend on whether (a) Credit Event(s) has(ve) occurred in respect of such Reference Entity(ies) unless the capital is guaranteed in full at maturity in which case the redemption amount payable at maturity will be equal to the initial nominal amount but the redemption date will be delayed in case of the occurrence of (a) Credit Event(s) in respect of such Reference Entity(ies). If between the First Credit Event Occurrence Date and the Last Credit Event Occurrence Date, (a) Credit Event(s) occur(s) with respect to one or more of the Reference Entity(ies), the Notes will be adversely affected by an actual loss of principal and/or diminution of the coupons. Consequently, the Notes may create significantly leveraged exposure to the credit of such Reference Entity(ies). Unless the capital is guaranteed in full at maturity, the product includes a risk of capital loss in part or in whole, as the result of Credit Event(s) occurring with respect to the Reference Entity(ies).

Limited liquidity of obligations : Some of the Obligations and if applicable, Deliverable Obligations or Selected Obligations may have no, or only a limited, trading market. The liquidity of these obligations will vary generally with, among other things, general economic conditions, domestic and international political events, developments or trends in one or more particular industries. The financial markets have experienced periods of volatility and reduced liquidity which may reoccur and reduce the market value of the Obligations and if applicable, Deliverable Obligations or Selected Obligations. Some of the Obligations, Deliverable Obligations or Selected Obligations may also be subject to restrictions on transfer and maybe considered illiquid. Any such event may have a negative impact on the market value and/or liquidity of Notes.

Credit Rating : Noteholders should be aware that credit ratings do not constitute a guarantee of the quality of the Notes or the Reference Entity(ies). The rating assigned to the Notes by the rating agencies, if any, is based on the Reference Entity(ies)'s current financial condition (or, as the case may be, the Reference Entity(ies)'s long term unsubordinated debt rating) and reflects only the rating agencies' opinions. In respect of the Reference Entity(ies), rating agencies do not evaluate the risks of fluctuation in market value but attempt to assess the likelihood of principal and/or interest payments being made. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning agency. Nevertheless, the rating agencies may fail to make timely changes in credit ratings in response to subsequent events so that a Reference Entity(ies)'s current financial condition may be better or worse than a rating indicates. Accordingly a credit rating may not fully reflect the true risks under the Notes.

DISCLAIMER – IMPORTANT INFORMATION FOR INVESTORS

This document is of summary nature and does not constitute an offer, personal recommendation or solicitation to subscribe for, or purchase, the Notes described herein and should not be construed as giving investment advice. The Issuer has no obligation to issue the Notes, and the Notes described herein will be exclusively subject to the detailed provisions contained in the Final Terms, the Base Prospectus and any Supplement(s) to the Base Prospectus.

General selling restrictions: It is each investor's responsibility to ascertain that it is authorised to subscribe, or invest into, this product. The underlying instrument(s) of certain products may not be authorised to be marketed in the country(ies) where such products are offered. The attention of investors is drawn to the fact that the offering of these products in this (these) country(ies) in no way constitutes an offer, or an invitation to make an offer, to subscribe to, or purchase, the underlying instrument(s) in such country(ies).

Information on commissions, remunerations paid to, or received from third parties: If, under applicable laws and regulations, any person (the "Interested Party") is required to disclose to prospective investors in the product any commission or remuneration that Société Générale and/or the Issuer pay(s) to, or receives from, such Interested Party in respect of the product, the Interested Party shall be solely responsible for compliance with such laws and regulations.

The product is indexed to not more than one third on a fund that is not authorized to be publicly distributed in Switzerland: The product is indexed to collective investment schemes within the meaning of the CISA. However, no more than one third of the value of the product depends on any underlying collective investment scheme within the meaning of the CISA that has not been authorized by FINMA for public distribution in Switzerland, and accordingly, distribution of this product in Switzerland does not qualify as indirect distribution of any such collective investment scheme not approved by FINMA. Further, this document in no way constitutes an offer to subscribe to the units of such underlying collective investment schemes.

Information on data and/or figures drawn from external sources: The accuracy, completeness or relevance of the information which has been drawn from external sources is not guaranteed although it is drawn from sources reasonably believed to be reliable. Subject to any applicable law, neither Société Générale nor the Issuer shall assume any liability in this respect.

Information on simulated past performance and/or on future performance and/or on past performance: The value of your investment may fluctuate. When simulated past performance or past performance is displayed, the figures relating thereto refer or relate to past periods and are not a reliable indicator of future results. This also applies to historical market data. When future performance is displayed, the figures relating to future performance are a forecast and are not a reliable indicator of future results. Furthermore, where past performance or simulated past performance relies

on figures denominated in a currency other than that of the country of residence of an investor, the return for such investor may increase or decrease as a result of currency fluctuations. Finally, when past or future performance or simulated past performance is displayed, the potential return may also be reduced by the effect of commissions, fees, taxes or other charges borne by the investor.

Confidentiality: This document is confidential and may be neither communicated to any third party (with the exception of external advisors on the condition that they themselves respect this confidentiality undertaking) nor copied in whole or in part, without the prior written consent of Société Générale.
