Scheduled Maintenance Inspections Gulfstream G550 and G500

AIRCRAFT APPLICABLE

- Gulfstream G550
- Gulfstream G500

NOTES

- Inspections are based on the Aircraft Maintenance Manual Chapter 5-20-00 inspection program.
 - Estimates do NOT include chapter 5-10-00 (Time Limits) items or completion ICA required inspections.
- Discrepancies found during inspections, can vary significantly due to the age of the aircraft, mission requirements, operating environment and past maintenance practices.
- Downtime is based on accomplishing that specific task or inspection and does not include correction of discrepancies.
- The estimated Budgetary out-the-Door price includes the inspection, estimated interior access and minor discrepancies. It does not include replacement, repair or overhaul of any Serialized parts, LRU's, avionics/electrical "black boxes", indicators / gauges, probes, transmitters, sensors, life-limited or time-controlled parts.

GULFSTREAM FEATURES & BENEFITS

- Factory trained service technicians, engineers and specialists at 11 Gulfstream facilities strategically located around the world provide AOG and warranty support your aircraft.
- OEM sign-off of larger inspections helps to maintain the long term value and integrity of the maintenance history of the aircraft.
- Extensive back-shop capabilities for the overhaul and major repair of landing gear, APUs, wheels, brakes, thrust reversers, batteries, fuel pumps, avionics and other components.
- On-site FAA designated engineering representatives for rapid coordination and approval of repairs or installations.
- Experienced technicians and quality assurance personnel utilize radio-graphic X-ray, non-destructive testing (NDT) and handheld test equipment.
- Extensive parts inventory for efficient operations and minimal downtime.
