- I heard from Rony; he recommended you rechecking your blood test with me when you return to NY for a follow up of cholesterol
- The names of the 2 biofeedback devices we discussed are:
 - Resp-e-Rate; headphones FDA approved for hypertension)
 - Stress Eraser; heart rate variability monitor; the book Heart Math explains this well
- I'll see you next week when you are back in NY; ideally come in for a fasting morning blood test 3-4 days before seeing me for an office visit

All supplements are available at
