Date: October 6, 2011

Patient: Jeffrey Epstein (Email: jeevacation@gmail.com)

- Eat a very soft, bland diet for the next 2-3 days
- Continue off Aleve
- Discontinue niacin for now until stomach symptoms are gone
- If symptoms are not better in 2-3 days, or worsen before then you will probably need, ideally a stool culture, and antibiotics. For this, Dr. Cahill usually prescribes:
  - amoeba antibiotic: metronidazole (Flagyl) or Humatin (paromamycin) 250mg three times a day for 7 days; along with,
  - bacterial antibiotic: Cipro 250 mg or Doxycycline 50 mg one tablet twice a day
- Use a probiotic (e.g. acidophilus) twice daily now, and especially if you use antibiotics
- Call tomorrow to let me know how you are doing
