### Environment / Estelle Trust

Chapman Freeborn is concerned about the environment and has monitored developments in carbon offsetting closely. It is an industry which is still unregulated, and at the current time we have no plans to introduce such a scheme. As an alternative we have chosen to directly support the Estelle Trust - a registered charity promoting green wind pump projects in rural Zambia. If you are interested in finding out more about this organisation or would like to make a donation please visit our website: <http://www.chapman-freeborn.com/en/environment/>

### Charter Assurance Plan

Chapman Freeborn has introduced a Charter Assurance Plan to increase clients' peace of mind during testing economic times, both globally and in the aviation industry. The Plan is an optional addition to our usual service and lays out financial assurances regarding the sourcing of a replacement aircraft, and / or compensation in the case of financial or technical failure of the carrier. Full details are available on request.

Thank you for the opportunity to quote on this charter, please don't hesitate to contact us if you have any questions.

Best regards,

**Caroline BOURGE**
