THE ENERCEL® STORY

ENERCEL® is the end result of decades of in-depth research, monumental studies, vast principle investment, many individuals' loyalty and passion, and extensive man-and-woman-hours. It all started from a diagnosis of colon cancer.

Over twenty years ago Dr. David Christner was given a death sentence. So he chose to live his remaining days in the arena of what he loved most. Art. Shortly after his diagnosis and death prognosis, he boarded a plane and flew to Argentina. He had heard of a unique artist, and feeding this passion, he flew to see him personally. It was while he was in Argentina, he heard of a natural medicine which was supposed to cure cancer. Naturally inquisitive, he searched and found the source of the medicine.

A German scientist was working with homoeopathics. He had flown to Argentina, the land of the cacti, as he wanted to test his homoeopathic product on the cacti, because cactus is a cellular plant akin to the human body. He was experiencing great success. The cancerous cacti were being "healed" of cancer. Concurrently the scientist's mother was diagnosed with breast cancer. He used his new homoeopathic combination on her. She cured. He opened a clinic. Word of mouth soon had hundreds of patients lining up for consultations. This success attracted the government. Then as life is at times truer than fiction, shortly thereafter, the German scientist disappeared.

A local news station did a report on the German Scientist's clinic naming a local Argentinian as its new principal. This Argentinian was a cacti hobbyist. The news report brought even more patients. It was at this time that David Christner met with the Argentinian hobbyist. Having nothing to lose, Dr. Christner used the homoeopathic on himself. Having no adverse reactions, even though the product was being manufactured in a hovel's kitchen, he purchased a supply and returned to the United States. He continued to use the product for ten weeks. At the end he went back to his oncologist for tests. The results showed him to be without cancer.

Two decades have passed. In that time, Dr. Christner has worked at bringing the product up to and beyond the basic requirements for homoeopathics within the United States of America. He utilized only raw materials as per the Homoeopathic Pharmacopeia of the United States (HPUS). Due to his passionate diligence and personal stewardship of spending over \$11 Million, today Enercel® is scientifically proven to be 100% non-toxic. It has been utilized by numerous Medical Doctors and health practitioners worldwide in the support of individuals who themselves had been given the death prognosis. Dr. Christner named the product Enercel® based on its identity of "**Energizing** each individual **cell**". Many cheers have emanated from the many proponents of Enercel®, as they see their precious Enercel® assisting individuals in their fight for life.

Today Enercel® is registered in many countries. MOU's are in hand for some country's studies utilizing Enercel® against three stages of Breast Cancer, Hepatitis C, Tuberculosis, Mycobacterium Tuberculosis and Lung Cancer. Not yet accepted by the USA FDA, Enercel® is being utilized on a Personal Use Exemption Form by many who are looking for a safe, non-toxic, non-contraindicating product which may help them fight their particular disease challenge.

Enercel® is manufactured by World Health Advanced Technologies, Ltd. (W.H.A.T.). Its goal is to have Enercel® available to all residents of the planet who require help with attaining and maintaining each their own optimum health.
