---

Jeffrey,

My comfort level for a trip around the world would be best answered after the Test flight. It would be best to accomplish some domestic flights before launching around the world trip, the Boeing has been sitting for the past 4+ years, except for several trips last year, March 2012 NY - Paris, November 2012 Paris - NY, NY - St Thomas, January 2013 St Thomas - PBI (we lost a Gyro on the last flight, if you remember.)

Attached is the Final invoice for your review that must be paid in full before any test flight. Rich Kahn has questions in regards to this invoice I will address with him on Monday.

thank you,  
Larry
