Save the Date!

You are invited to an evening of provocative talks followed by drinks in celebration of Open Science Publishing, hosted by [F1000Research](#).

WHAT: *Challenging the Science Publishing Status Quo*
F1000Research Sets New Standards for Transparency through Open Science Publishing

WHEN: Monday, April 22, 2013
5:30pm - 8:30pm

WHERE: Boston Convention Center, Room #052A
415 Summer St, Boston, MA 02210

Coinciding with the Experimental Biology meeting in Boston, this event brings together leading minds in life sciences to discuss the benefits of Open Science publishing for the research community. The discussion will cover the significant issues currently affecting the way research findings are published including:

- The importance of rapid publication and the negative impact of delays;
- The benefits of a completely open and transparent peer review;
- The importance of open publication of all data to enable reuse and the testing of reproducibility by others;
- The implications of the move towards open access (and full CC-BY access) by governments and funders;
- The benefits of publishing small science findings, null/negative/replication results, and other non-standard studies.

WHO: The distinguished list of speakers from the scientific community include:

Vitek Tracz: Chairman and Founder, F1000, and a pioneering supporter of Open Access

Steven Hyman: Distinguished Service Professor of Stem Cell and Regenerative Biology and Scholar in Residence, Broad Institute, Harvard University and MIT (and past-Provost, Harvard University)

Keith Flaherty: Director of Developmental Therapeutics, Massachusetts Cancer Center

Gary Borisy: Former President and Director, Marine Biological Laboratory, Woods Hole

Lawrence Kane: Director, Immunology Graduate Program, University of Pittsburgh

We expect this event will fill up fast so if you and your colleagues would like to attend, please register at: <http://f1000research-eb13.eventbrite.com>, no later than Friday, April 12th.

With kind regards,
Jane and Rebecca

Jane Hunter
