When I left the office I asked Allan and I didn't see the cables, he will be looking into it.

Also just an FYI I logged in the dragonwave to gather some information and I noticed that both Ethernet ports (data and management) on the LSJ side are plugged in to the switch creating a network loop. What I did was shutdown the management port on outside. This will help some but will be fixed tomorrow. I would not be surprised that accessing the internet is smoother now due to lowering of the packet drops and max times

Pings before shutting down the port

Success rate is 98 percent (9876/10000), round-trip min/avg/max = 1/4/128 ms

After

Success rate is 99 percent (9999/10000), round-trip min/avg/max = 1/4/44 ms

Hi Hector

Terrence stated that the login for dragonwaves are set to factory default.

Hi Jermaine,

I just spoke with omar and the cable hasn't arrived, what we can do is this, I'll split the work on two trips, I'll go tomorrow weather permitting (it's supposed to be sunny) regardless if the VINGN circuit is ready and I'll do the installation. I'll bring up the router and install the 2 switches to be able to monitor the dragonwave and I'll leave the deep inspection and testing for the second trip once VINGN is up.

There will be a downtime of between 1 to 2 hours as I make the changes. If this is acceptable I'm a GO for tomorrow. What I'll need after the switch installation is the logins for the dragonwave so once this is done I can start with the verification of the link (no changes will be made).

On the second trip I'll go to the island with Alyster takedown the dragonwave to do the following:

- Test VINGN circuit
- Test VINGN failover
- Verify all grounding
- Verify all connectors weatherproofing
- Verify Lightning arrestors
- Check all cables and replace cables if needed
- Upgrade firmware on DW if needed
- Make configuration changes to the DW if needed

Let me know if this is acceptable.

Good Evening Omar,

I am following up to verify that VINGN is on target for tomorrow and Choice for Friday.

Perfect, you got everything. The PDF only had the fiber from Power and Tel and not the items from curvature, so I just wanted to make sure.

Thanks

Good day Hector

I have 2 simplex and 3 duplex cables from power and tel. I have 1 hwic module and 1 glc connector.

Those are the fiber cable from power and tel, was an order placed for the culvature items?

Bellow I highlighted the items:

Green are the items from Power and Tel that arrived

Yellow are the items from Culvature that I do not see listed on the PDF

Jermaine,

Can you send me a list of all the items that you received? I want to make sure we have everything. I just created a BOM to keep track of what is needed and I'm sure I'll adding to the work/pending list

BOM

EFTA01139441

QTY	part	desc	Installed	Location	arrived	Responsibility
1	CISCO2921/K9	Cisco Router		Data Room	Installed	Choice
1	GLC-BX-D	ViNGN Simplex Single Mode Module	In the cisco router	Data Room		LSJ
1		ViNGN Simplex Cable 35' ST to LC	Between Cisco Router and Patch Panel (coming from STT)	Data Room		LSJ
1	HWIC-1GE-SFP	WIC Card for SFP	Cisco Router	Data Room		LSJ
1		MM Duplex fiber cable 6' SC to LC	Between Cisco Router and Patch Panel	Data Room		LSJ
1	GLC-SX-MM	MM Fiber Module	Cisco Router	Data Room	x	Choice
1	GLC-SX-MM	MM Fiber Module	Cisco 3560	Building - Gym	x	Choice
1		MM Duplex fiber cable 6' SC to LC	Between Cisco 3560 and patch Panel	Building - Gym		LSJ
4		rackmount screws	for Cisco 3560	Building - Gym		LSJ
1	3560G-24	Cisco 3560		Building - Gym	x	Choice
1	3560G-24	Cisco 3560		Outside Cabinet	x	Choice
4		rackmount screws	for Cisco 3560 Could use existing from netgear	Outside Cabinet		LSJ

Other Pending Items/Work

Cross Connect		STT Beach		ViNGN
Router Config Info			X	LSJ
Dragonwave Warrantee Info				??
Dragonwave Survey	Includes Signal, Firmware, Hardware, Monitoring, Grounding			Choice

Thank you Hector.

On Nov 25, 2015, at 11:37 AM, Hector Cintron < > wrote:

I can only comment about #3

3 – it should, this way I can do a full integration of the ViNGN, Dragonwave backup, test failover.

The plan that I would like to do:

- install ViNGN via the new router. Test it and switch the island over this new connection (primary)
- Once this is done I can takedown the Dragonwave connection to add some switches to be able to monitor the link and take over maintenance. Once this is complete
- Reconnect the Dragonwave as secondary link
- Test failover to Secondary (DW).

The above plan has a 1-2 min downtime.

If ViNGN is not ready I can still do the install but I need to install the switches needed to monitor the dragonwave there will be a downtime of a few hours as I do the swap but no testing will be done.

Hector.

Ok.

1. Does this still need to be scheduled with them?
2. If so, do we do that or do you?
3. Does this need to be done before Hector goes to the island or can it be done anytime afterwards?

The crossover does require a visit to the Pole (the one in St Thomas at the beach) where ViNGN connects to the fiber the goes to the Island.

Does this "crossover" require ViNGN to visit the site or is it something that is done remotely from their office?

On Nov 25, 2015, at 10:01 AM, Omar Welch < > wrote:

Hi Cecile

The connection does play a part in the delay until Monday but not the confirmation for today as no confirmation was made for today. We are assisting ViNGN to be ready for Monday.

Good morning Omar and Hector,

Has the date switched to Monday due to the fact that VINGN has not done the crossover? If so, why did Hector confirm today? Will VINGN complete the crossover by Monday?

On Nov 25, 2015, at 9:02 AM, Jermaine <[REDACTED]> wrote:

Good day Omar

I am not understanding this. As per my conversation, I stated Monday is too long. I started receiving emails from Hector concerning the installation shortly after. One of my last email was confirming tomorrow.

Jermaine per my message Hector will not be able to complete installation until Monday please make arrangements for this. Also we are still awaiting confirmation from VINGN on the cross connect.

Good Day Hector,

Please be advised, all components are here in the office ready for installation tomorrow. Does VINGN have the crossover in place?

Hi Jermaine,

Can you send me a list of the items you have for the install? I want to make sure we have everything before I head over there.

Thanks.

I cannot give you a date sense it's all based on the following:

- ? ViNGN installs the cross connect
- ? whether we order the parts or LSJ order the parts. This was something that Omar was going to speak to (sorry I do not know the name) LSJ Finance.
 - o For VINGN connection (Router Module, Fiber Module, Fiber cable)
 - o Choice connection (switches, fiber cables)

Also just an FYI I'll be going on vacation starting this Friday and I'll be back on Monday 23rd so assuming all the above is installed, purchased and delivered by the time I get back it would be sometime the week of the 23rd

Hector.

Good morning gentlemen

The principal is requesting a new date for the fiber. Do you have a suggested estimated time of completion?

Regards
Juan

Good evening all
When is the new date for the connection so I can update my superiors
