

Triad InRoom Gold Center

Serious home theater requires a serious center channel speaker; one that reproduces dialog with clarity and authority. Triad is proud to introduce your ticket to audio realism, the InRoom Gold Center.

Triad's all new InRoom Gold Center features proprietary drivers and a fully engineered, acoustically inert enclosure for low distortion, high sensitivity, and high power handling. The performance begins to approach that of the formidable Triad InRoom Platinum Center, but at a more moderate price. The Gold Center mates well with the best separate electronics, but is also compatible with A/V receivers, and is equally adept at reproducing music and movie soundtracks.

To visually blend into your décor, the InRoom Gold Center is available in a variety of book-matched real wood veneer, as well as custom matched paint and veneer options.
